10pt Cutty Sark is a British clipper ship. Built on the River Clyde in 1869 for the Jock Willis Shipping Line, she was one of the last tea clippers to be built and one of the fastest, coming at the end of a long period of design development, which halted as sailing ships gave way to steam propulsion. The opening of the Suez Canal (also in 1869) meant that steamships now enjoyed a much shorter route to China, so Cutty Sark spent only a few years on the tea trade before turning to the trade in wool from Australia, where she held the record time to Britain for ten years.[4] Improvements in steam technology meant that gradually steamships also came to dominate the longer sailing route to Australia, and the ship was sold to the Portuguese
