24pt The system is very flat and compact. All seven of TRAPPIST-1 planets orbit much closer than Mercury orbits the Sun, except for TRAPPIST-1b, they orbit farther than the Galilean satellites do around Jupiter, but closer than most of the other moons of Jupiter. The distance between the orbits of TRAPPIST-1b and TRAPPIST-1c is only 1.6 times the distance between the Earth and the Moon.

12pt Cutty Sark was ordered by shipping magnate John Willis, who operated a shipping company founded by his father. The company had a fleet of clippers and regularly took part in the tea trade from China to Britain.
