The image displays four lowercase 'a' characters in a row, each representing a different weight of the Google Sans Hardware font family. The characters are rendered in a clean, sans-serif style with a consistent x-height. The first 'a' is the lightest, followed by progressively heavier weights. The characters are positioned between two horizontal blue lines that serve as a baseline and a top line for the font.

6pt Cutty Sark is a British clipper ship. Built on the River Clyde in 1869 for the Jock Willis Shipping Line, she was one of the last tea clippers to be built and one of the fastest, coming at the end of a long period of design development, which halted as sailing ships gave way to steam propulsion. The opening of the Suez Canal (also in 1869) meant that steamships now enjoyed a much shorter route to China, so Cutty Sark spent only a few years on the tea trade before turning to the trade in wool from Australia, where she held the record time to Britain for ten years.[4] Improvements in steam technology meant that gradually steamships also came to dominate the longer sailing route to Australia, and the ship was sold to the Portuguese company Ferreira and Co. in 1895 and renamed Ferreira. She continued as a cargo ship until purchased in 1922 by retired sea captain Wilfred Dowman, who used her as a training ship operating from Falmouth, Cornwall. After his death, Cutty Sark was transferred to the Thames Nautical Training College, Greenhithe in 1938 where she became an auxiliary cadet training ship alongside HMS Worcester. By 1954, she had ceased to be useful as a cadet ship and was transferred to permanent dry dock at Greenwich, London, for public display. Cutty Sark is listed by National Historic Ships as part of the National Historic Fleet (the nautical equivalent of a Grade 1 Listed Building). She is one of only three remaining original composite construction (wooden hull on an iron frame) clipper ships from the nineteenth century in part or whole, the others being the City of Adelaide, which arrived in Port
